

Field Services

Utilize Our Field Service Experts As An Extension Of Your In-House Resources

Allegiant offers a full suite of Field Services to ensure energy consumption accuracy and avoid revenue loss.

Our Field Service Offerings are available as full service or ala carte; allowing Utilities to select the offering that meets their unique challenges. General Field Testing, validation, inspection of Meters of all types, combined with proactive audits and surveys are proven to improve system performance and revenue assurance for Utilities across the United States.

Allegiant is now augmenting our Field Services with onsite Utility Calibration Services. These Calibration Services cover Electric Meter Test Boards, Portable Meter Test Sets, Site Analyzers and more.

Our experienced staff of Field Specialists utilize proven Radian Research products and WECO diagnostic technology to conduct comprehensive site analysis and meter testing. You'll receive a thorough technical assessment including executive summary findings, results, and recommendations.
