

## Service Center

### We've Got You Covered With a Full Portfolio of Repair Services

Allegiant's Service Center offers a suite of metering products and services across residential and commercial electric metering brands, network infrastructure equipment and smart meter communications technologies.

Meter services include integrating and testing Smart Meter communications, certifications, sample testing, meter and communications programming as well as firmware upgrades, accuracy testing, custom labeling, comprehensive reconditioning, and a portfolio of repair services.

Certified in Radian Technology for Landis+Gyr and Aclara meters, we calibrate your meters on one of our Radian Test Systems and test records are distributed electronically.

With our industry leading turnaround time there is less down time for you and your team.
