

## DEPLOYMENT

Delivering innovative deployment services built on decades of engineering and program management expertise.

Allegiant's Deployment Services are integrated with proven program management solutions, providing Utilities robust, transparent, and customer centric services. We are fully versed in Smart Grid technologies and provide comprehensive deployment services unique to our customer's needs.

- Deploying Residential and Commercial Meters
- Installing Network Infrastructure
- Program Management
- Meter and Network Disposition: Storage, Inventory Management, Disposal and more
- Theft and Safety Monitoring
- Auxiliary Service
  - Meter: Tension Testing, Thermal Scan, Submeter GPS, and CT Burden Test
  - Deployment: Asset and Cross Dock Management, Material Handling, and Palletizing

### Our Model's Been Proven With Over 500,000 Annual Device Installations

Allegiant offers regional staffing options for the roles of Project Manager, Field Foreman, Work Order Manager, Field Technicians and a full-service Appointment Call Center.

Additionally, our partnership with Conductive Digital allows all of our customers access to Peak WorkFlow®, a fully integrated planning, deployment and field service software platform providing comprehensive operational tools for transparent project success. This proprietary customer engagement software platform includes bulk meter exchange, billing, quality and safety through a configurable interactive dashboard.

Our suite of deployment services are unified and strictly governed by resilient safety and quality assurance processes that allow our customers full visibility to monitor project success.

### Warehousing and Inventory Management

We are well versed in establishing regional inventory and material handling management programs. Our Inventory Management Programs are unified with customer requirements, include recurring reconciliation, and are strategically located within the region. We align a dispersed warehousing strategy to ensure efficient and timely work completion.
